

## Exporting (sharing) with iMovie

There are many ways to export your movie for sharing. When you are done with your film, choose **Share – Export Movie**.

Choose Large and give your film a name and export it to the desktop. This will export your film as an .mv4 that plays easily in iTunes.

Occasionally you will want to share your movie as an mov, which will have better quality. Choose **Share – Export Movie Using QuickTime**. Then use the following settings:

Movie to QuickTime Movie. Then choose **Options**.
